

Number and Place Value

EYFS	Year I	Year 2	Year 3	Year 4	Year 5	Year 6
			COU	NTING		
Verbally count beyond 20, recognising the pattern of the counting system.	count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number			count backwards through zero to include negative numbers	interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero	use negative numbers in context, and calculate intervals across zero
Explore and represent patterns within numbers up to 10, including evens and odds,	count, read and write numbers to IOO in numerals; count in multiples of twos, fives and tens	count in steps of 2, 3, and 5 from 0, and in tens from any number, forward or backward	count from 0 in multiples of 4, 8, 50 and 100;	count in multiples of 6, 7, 9, 25 and 1 000	count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000	
double facts and how quantities can be distributed equally.	given a number, identify one more and one less		find 10 or 100 more or less than a given number	find 1 000 more or less than a given number		
			COMPARII	NG NUMBERS		
Compare quantities up to 10 in different contexts,	use the language of: equal to, more than, less than (fewer),	compare and order numbers from 0 up to 100; use <, >	compare and order numbers up to	order and compare numbers beyond 1,000	read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit (appears also in Reading and Writing Numbers)	read, write, order and compare numbers up to n 10 000 000 and determine the value of each digit (appears also in Reading and Writing Numbers)
recognising when one quantity is greater than, less than or the same as the other quantity.	most, least	and = signs		compare numbers with the same number of decimal places up to two decimal places (copied from Fractions)		
			IDENTIFYING, REPRESENTI	ING AND ESTIMATING NUMBERS		
Subitise (recognise quantities without counting) up to 5.	identify and represent numbers using objects and pictorial representations including the number line	identify, represent and estimate numbers using different representations, including the number line	identify, represent and estimate numbers using different representations	identify, represent and estimate numbers using different representations		
			READING AND W	RITING NUMBERS (including Roman	Numerals)	
	read and write numbers from I to 20 in numerals and words.	read and write numbers to at least 100 in numerals and in words	read and write numbers up to I 000 in numerals and in words tell and write the time from an analogue clock, including using Roman numerals from I to XII, and I2-hour and 24-hour clocks (copied from Measurement)	read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.	read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit (appears also book b Comparing Numbers) read Roman numerals to 1 000 (M) and recognise years written	read, write, order and compare numbers up to 10 000 000 and determine the value of each digit (appears also in Understanding Place Value)

EISION HALL	UNDERSTANDING PLACE VALUE						
Have a deep understanding of number to 10, including the composition of each number:	recognise the place value of each digit in a two-digit number (tens, ones) recognise the place value of each digit in a three-digit number (hundreds, tens, ones) recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones) recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones) find the effect of dividing a one-or two-digit number by 10 and 100, identifying the value of the	termine the (appears also					
	digits in the answer as units, tenths and tenths and hundredths (copied from Fractions) digits in the answer as units, tenths and relate them to tenths, hundredths and decimal equivalents (copied from Fractions) (copied from Fractions) (copied from Fractions) three decimal places and divide numbers by three decimal places and divide numbers by Fractions)	and multiply by 10, 100 and wers are up to					
	ROUNDING						
	round any number to the nearest round any number up to 1 000 round any whole number up to 1 000 to accuracy 100 or 1 000 and 100 000						
	round decimals with one decimal round decimals with two decimal solve problems which in place to the nearest whole number (copied from Fractions) round decimals with one decimal swith two decimal places to the nearest whole number and to one decimal place (copied from Fractions) round decimals with one decimal round decimals with two decimal solve problems which is answers to be rounded degrees of accuracy fractions)	d to specified					
	PROBLEM SOL VING						
	use place value and number facts to solve problems and number facts to solve problems involving these ideas. That involve all of the above and practical problems that involve all that involve all of the above numbers That involve all of the above number problems that involve all that involve all of the above numbers						

Addition and Subtraction

EYFS	Year I	Year 2	Year 3	Year 4	Year 5	Year 6
			NUMBER	BONDS		
Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.	represent and use number bonds and related subtraction facts within 20	recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100				
			MENTAL CA	LCULATION		
	add and subtract one-digit and twodigit numbers to 20, including zero read, write and interpret mathematical statements involving addition (+), subtraction (-) equals (=) signs (also in Written Methods)	add and subtract numbers using concrete objects, pictorial representations, and mentally, including: • a two-digit number and ones • a two-digit number and tens • two two-digit numbers • adding three one-digit numbers show that addition of two numbers	add and subtract numbers mentally, including: a three-digit number and ones a three-digit number and tens * a three- digit number and hundreds		add and subtract numbers mentally with increasingly large numbers	per form mental calculations, including with mixed operations and large numbers use their knowledge of the
	(also in Written Methods)	can be done in any order (commutative) and subtraction of one number from another cannot				order of operations to carry out calculations involving the four operations
			WRITTEN I	METHODS		
	read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs (appears in Mental Calculation)		add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction (CP – Move to Y4)	add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate	add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)	
			INVERSE OPERATIONS, ESTIN	IATING AND CHECKING ANSWERS		
		recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.	estimate the answer to a calculation and use inverse operations to check answers	estimate and use inverse operations to check answers to a calculation	use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy	use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy.

ELSTON HALL	PROBLEM SOL VING							
	solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as 7 = 9	solve problems with addition and subtraction: * using concrete objects and pictorial representations, including those involving numbers, quantities and measures * applying their increasing knowledge of mental and written methods	solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction	solve addition and subtraction twostep problems in contexts, deciding which operations and methods to use and why	solve addition and subtraction multistep problems in contexts, deciding which operations and methods to use and why	solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why Solve problems involving addition, subtraction, multiplication and division		
		solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change (copied from Measurement)						

Multiplication and Division

Year I	Year 2	Year 3	Year 4	Year 5	Year 6
7001	7007 2		& DIVISION FACTS	7000 3	7 000 0
count in multiples of twos, fives and tens (copied from Number and Place Value)	count in steps of 2, 3, and 5 from O, and in tens from any number, forward or backward (copied from Number and Place Value)	count from 0 in multiples of 4, 8, 50 and 100 (copied from Number and Place Value)	count in multiples of 6, 7, 9, 25 and 1,000 (copied from Number and Place Value)	count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000 (copied from Number and Place Value)	
	recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers	recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables	recall multiplication and division facts for multiplication tables up to 12 × 12		
		MENTAL CA	ALCULATION		
		write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods (appears also in Written Methods)	use place value, known and derived facts to multiply and divide mentally, including: multiplying by O and I; dividing by I; multiplying together three numbers	multiply and divide numbers mentally drawing upon known facts	per form mental calculations, including with mixed operations and large numbers
	show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot		recognise and use factor pairs and commutativity in mental calculations (appears also in Properties of Numbers)	multiply and divide whole numbers and those involving decimals by IO, IOO and IOOO	associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. ³ / ₂ (copied from Fractions)

ELSTON HALL		WRITTEN C	ALCULATION		
	calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (x), division (÷) and equals (=) signs	write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods (CP – Move to Y+) (appears also in Mental Methods)	multiply two-digit and three-digit numbers by a one-digit number using formal written layout (CP – Move to Y5)	multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers	multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication
				divide numbers up to 4 digits by a onedigit number using the formal written method of short division and interpret remainders appropriately for the context	divide numbers up to 4-digits by a twodigit whole number using the formal written method of short division where appropriate for the context divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context
					use written division methods in cases where the answer has up to two decimal places (copied from Fractions (including decimals))

ELSTON HALL				
PROPL	ERTIES OF NUMBERS: MULTIPLES,_FAC	TORS,_PRIMES,_SQUARE AND CUBE NUI	MBERS	
		recognise and use factor pairs and commutativity in mental calculations (repeated)	identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers. know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers	identify common factors, common multiples and prime numbers use common factors to simplify fractions; use common multiples to express fractions
			establish whether a number up to 100 is prime and recall prime numbers up to 19	in the same denomination (copied from Fractions)
			recognise and use square numbers and cube numbers, and the notation for 2 3 squared () and cubed ()	calculate, estimate and compare volume of cubes and cuboids using standard units, including centimetre cubed (cm) and cubic metres (m), and extending to other 3 units such as mmand km (copied from Measures)
	ORDER OF C	OPERATIONS		, 3
				use their knowledge of the order of operations to carry out calculations involving the four operations
	INVERSE OPERATIONS, ESTIMA	TING AND CHECKING ANSWERS		
	estimate the answer to a calculation and use inverse operations to check answers (copied from Addition and Subtraction)	estimate and use inverse operations to check answers to a calculation (copied from Addition and Subtraction)		use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy

EISION HALL		PROBLEM.	I SOL VING		
solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher (CP – Move to Y2)	solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts	solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects	solve problems involving multiplying and adding including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects	solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign	solve problems involving addition, subtraction, multiplication and division
				solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates	solve problems involving similar shapes where the scale factor is known or can be found (copied from Ratio and Proportion)

Fractions (including decimals and percentages)

Year I	Year 2	Year 3	Year 4	Year 5	Year 6
		COUNTING IN F	RACTIONAL STEPS		
	Pupils should count in fractions up to 10, starting from any number and	count up and down in tenths	count up and down in hundredths		
	using the 1/2 and 2/4 equivalence on the number line (Non Statutory Guidance)				
		RECOGNISIN	NG FRACTIONS		
recognise, find and name a half as one of two equal parts of an object, shape or quantity	recognise, find, name and write fractions 1	recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators	recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten	recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents (appears also in Equivalence)	
	set 3 4 4 4 of objects or quantity	recognise that tenths arise from dividing an object into IO equal parts and in dividing one – digit numbers or quantities by IO.			
recognise, find and name a quarter as one of four equal parts of an object, shape or quantity		recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators			
		COMPARIN	G FRACTIONS		
		compare and order unit fractions, and fractions with the same denominators (CP – Move to Y4)		compare and order fractions whose denominators are all multiples of the same number	compare and order fractions, including fractions >1
		COMPARIN	NG DECIMALS		
			compare numbers with the same number of decimal places up to two decimal places (CP – Move to Y+)	read, write, order and compare numbers with up to three decimal places	identify the value of each digit in numbers given to three decimal places

ELSTON HALL					leaching of Mathematics
		ROUNDING INC	LUDING DECIMALS		
			round decimals with one decimal place to the nearest whole number (CP – Move to Y5)	round decimals with two decimal places to the nearest whole number and to one decimal place	solve problems which require answers to be rounded to specified degrees of accuracy
		EQUIVALENCE (INCLUDING FR		,	3
		PERCENTAGES)	TO THE TO THE PARTY OF THE PART		
	write simple fractions e.g. \square of $G = 3$ and recognise the equivalence of $2/4$ and \square .	recognise and show, using diagrams, equivalent fractions with small denominators	recognise and show, using diagrams, families of common equivalent fractions	identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths	use common factors to simplify fractions; use common multiples to express fractions in the same denomination
			recognise and write decimal equivalents of any number of tenths or	read and write decimal numbers as fractions (e.g. 0.71 = 71/100)	associate a fraction with division and calculate decimal fraction equivalents
			hundredths	recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents	(e.g. 0.375) for a simple fraction (e.g. 3/8)
			recognise and write decimal equivalents to	recognise the per cent symbol (%) and understand that per cent relates to "number of parts per hundred", and write percentages as a fraction with denominator 100 as a decimal fraction	recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.
		ADDITION AND SUL	BTRACTION OF FRACTIONS		
		add and subtract fractions with the same denominator within one whole (e.g. 5/7 + 1/7 = 6/7	add and subtract fractions with the same denominator	add and subtract fractions with the same denominator and multiples of the same number recognise mixed numbers and improper fractions and convert from one form	add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions
				to the other and write mathematical statements > I as a mixed number (e.g.	
				2/5 + 4/5 = 6/5 = 11/5	

ELSTON HALL				reaching or Mathematics
	MULTIPLICATION AND DI	IVISION OF FRACTIONS		
			multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams	multiply simple pairs of proper fractions, writing the answer in its simplest form (e.g.1/4 x 1/2 = 1/8 multiply one-digit numbers with up to two decimal places by whole numbers
				divide proper fractions by whole numbers (e.g. $1/3 \div 2 = 1/6$)
	MULTIPLICATION AND L	DIVISION OF DECIMALS		
				multiply one-digit numbers with up to two decimal places by whole numbers
		find the effect of dividing a one- or twodigit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths (CP – Move to Y5)		multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places
				identify the value of each digit to three decimal places and multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places
				associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. ³ / ₈)
				use written division methods in cases where the answer has up to two decimal places

ELSTON HALL	PROBLE	FM SOLVING		
	solve problems that involve all of the above	solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number	solve problems involving numbers up to three decimal places	
		solve simple measure and money problems involving fractions and decimals to two decimal places. (CP – Move to Y5)	solve problems which require knowing percentage and decimal equivalents of /, 1	

Ratio and Proportion

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6		
	Statements only appear in Year 6 but should be connected to previous learning, particularly fractions and multiplication and division						
					solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts		
					solve problems involving the calculation of percentages [for example, of measures, and such as 15% of 360] and the use of percentages for comparison		
					solve problems involving similar shapes where the scale factor is known or can be found		
					solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.		

National Centre for Excellence in the Teaching of Mathematics

Measurement

Year I	Year 2	Year 3	Year 4	Year 5	Year 6
	2	COMPARING AND ES		1 2200 2	
compare, describe and solve practical problems for: * lengths and heights [e.g. long/short, longer/shorter, tall/short, double/half] * mass/weight [e.g. heavy/light, heavier than, lighter than] * capacity and volume [e.g. full/empty, more than, less than, half, half full, quarter] * time [e.g. quicker, slower, earlier, later]	compare and order lengths, mass, volume/capacity and record the results using >, < and =		estimate, compare and calculate different measures, including money in pounds and pence (also included in Measuring)	calculate and compare the area of squares and rectangles including using standard units, square centimetres (cm) and square metres (m) and estimate the area of irregular shapes (also included in measuring) stimate volume (e.g. using I cm blocks to build cubes and cuboids) and capacity (e.g. using water)	calculate, estimate and compare volume of cubes and cuboids using standard units, including centimetre 3 3 cubed (cm) and cubic metres (m), and extending to other units such as 3 3 mm and km .
sequence events in chronological order using language [e.g. before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening]	compare and sequence intervals of time	compare durations of events, for example to calculate the time taken by particular events or tasks estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes, hours and o'clock; use vocabulary such as a.m./p.m., morning afternoon, noon and midnight (appears also in Telling the Time)			
		MEASURING and CAL	CULATING		
measure and begin to record the following: * lengths and heights * mass/weight * capacity and volume * time (hours, minutes, seconds)	choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels	measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)	estimate, compare and calculate different measures, including money in pounds and pence (appears also in Comparing)	use all four operations to solve problems involving measure (e.g. length, mass, volume, money) using decimal notation including scaling.	solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate (appears also in Converting)
		measure the perimeter of simple 2-D shapes (CP – Move to Y4)	measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres	measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres	recognise that shapes with the same areas can have different perimeters and vice versa

Geometry — Properties of Shapes

Year I	Year 2	Year 3	Year 4	Year 5	Year 6
		IDENTIFYING SHAPES /	AND THIER PROPERTIES		
recognise and name common 2-D and 3D shapes, including: * 2-D shapes [e.g. rectangles (including squares), circles and triangles] * 3-D shapes [e.g. cuboids	identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line identify and describe the properties of 3-D shapes, including the number of		identify lines of symmetry in 2-D shapes presented in different orientations	identify 3-D shapes, including cubes and other cuboids, from 2-D representations	recognise, describe and build simple 3-D shapes, including making nets (appears also in Drawing and Constructing) illustrate and name parts of circles, including radius, diameter and
(including cubes), pyramids and spheres].	edges, vertices and faces identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid]				circumference and know that the diameter is twice the radius
		DRAWING AND	CONSTRUCTING		
		draw 2-D shapes and make 3-D shapes using modelling materials;	complete a simple symmetric figure with respect to a specific line of	draw given angles, and measure them in	draw 2-D shapes using given dimensions and angles
		recognise 3-D shapes in different orientations and describe them	symmetry	degrees ()	recognise, describe and build simple 3-D shapes, including making nets lappears also in Identifying Shapes and Their Properties)
		COMPARING AN	ND CLASSIFYING		
	compare and sort common 2-D and 3-D shapes and everyday objects		compare and classify geometric shapes, including quadrilaterals and triangles, based on their	use the properties of rectangles to deduce related facts and find missing lengths and angles	compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles,
			properties and sizes	distinguish between regular and irregular polygons based on reasoning about equal sides and angles	quadrilaterals, and regular polygons

ANGLES					
		recognise angles as a property of shape or a description of a turn		know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles	
		identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle	identify acute and obtuse angles and compare and order angles up to two right angles by size	identify: * angles at a point and one whole turn (total 360) * angles at a point on a straight line and [] a turn (total 180) * other multiples of 90	recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles
		identify horizontal and vertical lines and pairs of perpendicular and parallel lines			

Geometry — Position and Direction

Year I	Year 2	Year 3	Year 4	Year 5	Year 6			
POSITION, DIRECTION AND MOVEMENT								
describe position, direction and movement, including half, quarter and three-quarter turns.	use mathematical vocabulary to describe position, direction and movement including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise)		describe positions on a 2-D grid as coordinates in the first quadrant describe movements between positions as translations of a given unit to the left/right and up/down	identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed	describe positions on the full coordinate grid (all four quadrants) draw and translate simple shapes on the coordinate plane, and reflect them in the axes.			
			plot specified points and draw sides to complete a given polygon					
PATTERN								
	order and arrange combinations of mathematical objects in patterns and sequences							

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6		
INTERPRETING, CONSTRUCTING AND PRESENTING DATA							
	interpret and construct simple pictograms, tally charts, block diagrams and simple tables	interpret and present data using bar charts, pictograms and tables	interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs	complete, read and interpret information in tables, including timetables	interpret and construct pie charts and line graphs and use these to solve problems		
	ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity						
	ask and answer questions about totalling and comparing categorical data						
	SOL VING PROBLEMS						
		solve one-step and two-step questions [e.g. 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables.	solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.	solve comparison, sum and difference problems using information presented in a line graph	calculate and interpret the mean as an average		

Algebra

Year I	Year 2	Year 3	Year 4	Year 5	Year 6			
EQUATIONS								
solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as 7 = -9	recognise and use the inverse relationship between addition and subtraction and use this to check calculations and missing number problems. (copied from Addition and Subtraction)	and Subtraction)	nber problems, using number facts, nd subtraction. (copied from Addition nber problems, involving multiplication	use the properties of rectangles to deduce related facts and find missing lengths and angles (copied from Geometry: Properties of Shapes)	express missing number problems algebraically			
(copied from Addition and Subtraction)	Subtraction	solve problems, including missing nun and division, including integer scalin (copied from Multiplication and Division)						
	recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100 (copied from Addition and Subtraction)				find pairs of numbers that satisfy number sentences involving two unknowns			
represent and use number bonds and related subtraction facts within 20 (copied from Addition and Subtraction)					enumerate all possibilities of combinations of two variables
