

Living Things and their Habitats

Year 2

I will explore and compare the difference between things that are living, dead and have never been alive.

I will understand that most living things live in habitats which are suited to their needs.

I will be able to name a variety of plants and animals in their habitats.

I will be able to describe how animals get their food from plants and other animals. I can show this in a simple food chain.

Year 4

I will be able to group living things in a variety of ways.

I will be able to use classification keys.

I will identify and name a variety of living things in my local and wider environment.

I will recognise that environments can change and this can be dangerous for living things.

Year 6

I will describe how living things are classified into broad groups according to common characteristics.

I will be able to describe the similarities and differences of living things including micro-organisms, plants and animals.

I will be able to give reasons for classifying plants and animals based on specific characteristics.

Year 5

I will describe the difference in the life cycles of mammals, amphibians, insects and birds.

I will describe the life process of reproduction in some plants and animals.
